## Mines and Mining Stocks

## SAYS CLIPPER

Average of \$5.77 a Ton in Mining Stocks Continue to Will Arrange Tonight to Enter-Gold Believed to Assure Dividends.

Samplings of ten faces of ore in various parts of the Clipper mine, in Wood day was slightly stronger than it was tute of Mining Engineers have been called River district, taken by E. G. Coffin, superintendent of the Lower Mammoth mine, upon his recent visit to Idaho, returned the average value of \$5.77 a ton in gold, no lead or silver, and a trace of copper. The ore bedies sampled varied in thickness from 18 inches to four and one-half feet. The average value shown by the assays was not so high as the ore was expected to run, but upon this head the Wood River Times says:

"Still, ore carrying \$5.77 per ton in gold is not to be despised, if found in sufficient quantity, as such ore will pay dividends. What is doing at the Homestake, in South Dakota, on \$3.50 ore; at the Treadwell, in Alaska, and at other mines, on \$5 ore, is known. The two mines named were and are among the most profitable in the world.

"At the Consolidated Mercur, in Utah, ore carrying only \$2.68 in gold yields a profit of slightly over 60 cents per ton, and it is a very rebellious ore that is expensive to work.

"The Green Mountain mines, in Sierra county Callifornia, paid dividends on 95-River district, taken by E. G. Coffin, Saturday, the trading was slow; out- by Duncan MacVichie, chairman of the re-

"The Green Mountain mines, in Sierr county, California, paid dividends on 9 cent ore. It was free gold ore. The co-of mining and milling was only 56 cen

or mining and milling was only 56 cent a ton.

"At the Clipper group of Mr. Sherr, the conditions are almost ideal. It is al ready tapped at a depth of over 700 feet and can be operated through tunnels t a depth of 1,500 feet. There is an ampl supply of water for mining and milling as much timber as can be needed in 2 years, and the property can be reached by automobile in an hour from Hailey With such advantages \$5 ore would pay a profit."

Coalition Company Uncover Rich Ore Far South of Best Working.

A new fortune in high-grade silver-lea ore is being uncovered on the south en of the Silver Island Coalition Mines com pany's Emancipator claim, according word received yesterday by President M C. King from Manager David Morrison The new find was uncovered by Mr. Pra in doing surface work and it is said the \$100 ore in shipping quantity has alread been disclosed.

The strike is fully 1,000 feet south are sacking high-grade ore at the rate of seven sacks a day. Including three men-sent to camp yesterday, the company now has a force of fifteen men employed, an practically the entire force is workin

The ore showing on the Emancipate The ore showing on the Emancipator claim is especially gratifying to the management for the reason that that clain is a portion of the ground acquired by the company by location. It is believed that the showing there will soon equathat in the bonded property, adjoining in which the greater amount of develop ment work has been done. Ample value of ore is in sight, it is said, to meet a least two payments on the bonded prop least two payments on the bonded property, and at the rate more is being opened it should be a matter of only a short time until the company will have its Ver. Cop. ... 12½ Yer. Cop. ... property cleared.

## ZINC PROCESS SUCCESS.

United States Puts Third Shift on New Separator.

The third shift was yesterday placed at work on the zinc concentrating plant of the United States Smelting, Refining of the United States Smelting, Refining & Mining company—an indication that the electrostatic process recently installed is working satisfactorily. As a matter of fact the results which are being obtained from use of the process are all that, if not more than, had been anticipated. Concentrates are being produced, it is said, which contain from 54 per cent to 57 per cent zinc, with as low as 2 per cent iron, and the product is being turned out with an ease which is astonishing. out with an ease which is astonishing. The magnets readily separate from the crushed ore the particles of iron, which are thrown off in a shower to one side, while the zinc and other contents are carried undisturbed on their way.

That the new process will revolution. That the new process will revolution-ize the treatment of ores with zinc contents, which have heretofore been re-garded as ultra-rebellious, seems assured

## Mining Notes.

Notices of the annual meeting of the Eagle & Biue Bell Mining company, to be held in this city Oct. 2. have just been mailed to stockholders by Secretary Imer Pett.

The date of sale of stock of the Zenol Silver & Copper company, upon which the recent assessment of 1 cent a share has not been paid, has been extended from Sept. 27 to Oct. 27.

Lyman Sisley, managing editor of the Mining World, and J. W. Holman, secretary of the Mining World company, were in the city on the way to Goldfield to attend the meeting of the American Mining congress.

Irvin Shuck, who for several years has been with the Western Ore Purchasing company at Goldfield, has returned to Salt Lake to make it his headquarters. Mr. Shuck believes that the general decline of the mining industry in and about Goldfield has been "scraping bottom" for some time, and that an upward tendency is to prevail from this time on; that the penalty for over-booming has been paid and that the industry is on a substantial hasis which assures progress.

tain Visiting Delegates to Institute.

While the mining stock market yester- Utah members of the American Instie in Salt Lake City Oct. 6 to 9, inclu-

> are the delegates who have been attend-ing the annual meeting of the institute held in Spokane, with side trips to Yellow-stone park, to Seattle and to Goldfield and other camps. They are men who are high in their profession, men who every year pass upon mining projects involving the investment of millions of dollars. The importance of their being afforded an opportunity to gain an accurate knowledge of mining conditions in Utah will be ap-parent, especially to mining men. And

> parent, especially to mining men. And that arrangements to this end may be assured, it is the desire of the entertainment committee that there be at tonight's meeting a full attendance of Utah members of the institute.
>
> That the visitors appreciate the importance of Sait Lake City as a mining center is indicated by their having allotted four days to their proposed visit in Utah, much longer time than they will devote to any other locality. The only arrangements so far perfected are for a visit to the mines at Bingham, to the smelters of the valley and the milis at Garfield. One of the things to be determined at the meeting will be as to what mined at the meeting will be as to what other camps may be visited.

been encountered on the 200-foot level of the E. P. H. workings of the Italy the E. P. H. workings of the Ibex Mining company, according to Superintendent D. E. Crafts, who was in the city yes-

terday.

The pipes of ore make at breaks in the large fissure. The one first opened is from eight to ten feet wide and thirty to forty long, and the new ones appear to be fully as large. The drift on the 200 level is cutting the tops of the ore bodies. On the first one a winze has been sunk to the depth of thirty feet, and it is getting much stronger at depth.

From the winze have been taken five carloads of ore, which have been shipped, the product running from 17 to 19 per cent copper, with gold and silver values. The rich ore comes in bulges in the main body, the second-class material carrying 6 and 7 per cent copper.

Mr. Crafts is sinking fifty feet deeper.

may be eucountered at any time. Drift-He is confident that he is going to have a big mine at depth. The fissure is in

lime between two perphyry dikes about 270 feet apart, the formation being in every way favorable for the making of large bodies of rich ore. He believes that the Detroit district will become one of the greatest producers in the state.

GEMINI SHOWING IS GOOD.

Eureka, Sept. 27.-From J. H. McChrystal, superintendent of the Gemini, it is learned that things are moving nicely at both the Gemini and Ridge & Valley, and both the Gemini and Ridge & Valley, and that operations will not be suspended on the lower levels of the Gemini, as reported. The pumps are handling the water without difficulty and the usual amount of work is going on in all parts of the two mines and will continue to do so, the showing being exceptionally good upon the lower levels. Two carloads of high-grade ore were shipped from the high-grade ore were shipped from the property last week.

Captain Hugo Deprezin is putting down rails in the long tunnel on the Golden Ray group of claims, adjoining the Cenennial-Eureka ground on the west. Oth er improvements are being made preparatory to staring work. Mr. Deprezin has had several opportunities to incorporate a company, but after giving the matter careful consideration he has decided to

careful consideration he has decided to personally handle the development of the ground, believing that a small amount of work will demonstrate the value of the Golden Ray claims.

According to P. T. Brockman, president of the East Tintic Gold King Mining company, that company has authorized the purchase and installation of a \$2,200 steam best first release and installation of a \$2,200 steam of the proposed line of the Moffat and the cheft will be a set of Park City, while the contact between time and quality and the contac hoisting plant and the shaft will be pushed to a further depth of 200 feet. The shaft is now down 200 feet, In the shaft a pocket of ore has been gone through and a mineralized fissure which promises something better has come into the shaft.

### FLAGSTAFF RAISE BREAKS INTO OLD MINE

Connection between the drain tunnel and he old Flagstaff workings at Alta was camp the 900-foot shaft was being drained. Connection was made through a raise driven from a point 4,000 feet from the mouth of the 5,000-foot tunnel. Three hundred feet of driving in the raise was required to connect with a drift on the 900-foot level of the old mine.

With the 100 feet of water drained from the old workings they will be thoroughly nvestigated with the vill be thoroughly and the nast the black and a variety of colors, including red, green and mottled. Not far from the marble deposit he has a body of iron ore ten feet wide which he says is traceable for at least a mile—just another evidence that a great wealth of resources awaits the development which will follow the completing of the Moffat road. he old workings they will be thoroughly nvestigated with the view of following down the ore bodies which were expose at the water level. The mine is wel equipped for active operations, and the management has every confidence in being able to make the property repeat its production of early days, which is said to have amounted to \$9,000,000.

### INJUNCTION AGAINST DAVIS-DALY MEETING

Portland, Me., Sept. 27.-An injunction 

president, has been granted by the Maine courts on the petition of Newman Erb and S. M. Jarvis.

The meeting will probably be held on Oct. 15, as Oct. 12 is the date set for the hearing of the injunction.

The petitioners claimed the stockholders did not have sufficient notification of

Mouthpiece Cigarettes

VERY smoker will find in these mouthpiece cigarettes a better quality of tobacco than in other cigarettes at any price-and a more convenient and enjoyable form of cigarette.

The mouthpiece cigarette-the Russian idea -is gaining favor with smokers everywhere. The mouthpiece takes the place of the tobacco you pay for, but never smoke, in other cigarettes.

You get just as long a smoke—and the manufacturer is able to give you a better quality of tobacco for the money.

You can smoke and enjoy a mouthpiece cigarette to the end-the tobacco cannot get moist and make the smoke bitter. Moreover, the mouthpiece cools the smoke and makes a holder -you do not stain your fingers.

Another advantage of Grand Duke Cigarettes—they are rolled in rice or mais paper crimped, not pasted.

## 10c for box of 10

THE JOHN BOLLMAN CO.,

Conditions in the big fissure on the tunnel level are precisely the same as they are in the inclined shaft above, where high-grade silver-lead ore has been opened, Mr. Griffith says. With a mineralization 100 feet wide, it was not to be expected, of course, that ore would fill the fissure, but the formation is such that no one can doubt that large bodies of cre will be found.

In the upper workings is a body of three and four feet of marketable ore. It is a cube galena earrying from 65 to 70 per cent lead and 30 ounces in silver. Six-

ber cent lead and 30 ounces in silver. Six-y to seventy tons of the ore have been aken out in sinking, no stoping having

een done.
